

GEO **GREEN**[®]
ARTIFICIAL TURF

REPLICATED GRASS

GEOGREEN® OVERVIEW

GeoGreen® Artificial Turf is a dimensionally stable 'Replicated Grass' consisting of a multi-layer, Matrix primary backing, with a urethane secondary backing which is heat activated to permanently lock fiber tufts in place.

GeoGreen® tufted with a 100% polyethylene yarn utilizing a curvilinear yarn configuration. The yarn is tufted with a 3/8" gauge (stitch separation) and a minimum filament height of 2".

GeoGreen is in-filled with resilient granules of proprietary bulk-density and sizing above a 1/4" ballast layer.

SHOCK PAD AND DRAINAGE BLANKET

GEOFLO® OVERVIEW

GeoGreen® is enhanced with GeoFlo® and GeoFlo®+ Dynamic Shock Pad and Drainage Blanket to maximize G-Max performance and to provide full area vertical-to-horizontal drainage.

This is accomplished while minimizing risks associated with aggregate base materials and sub-surface soils. GeoFlo® does not affect the ball-action or the natural feel-under-foot.

GEO **FLO[®]+**
SHOCK PAD

WARNING TRACK TECHNOLOGY

GEOTRAX® OVERVIEW

GeoTrax is the first synthetic filament warning track surface that meets all criteria for NCAA and High School play.

The GeoTrax Warning Track technology allows for superior functionality and significantly decreases maintenance.

GEO TRAX[®]

WARNING TRACK

GeoTrax[®] also eliminates the mold and mildew problem associated with some rubberized warning track surfaces. The surface is spike and cleat friendly and does not create a slip or fall hazard that are common to pour-in-place systems.
